OS: n/a

Processor: n/a

Graphics: n/a

Storage: 98 MB available space

Sound Card: n/a

Additional Notes: n/a

English

A fun game, it didn't seem to take off in the USA but it is very enjoyable if you like crime genre thrillers. It is a third person shooter however that is very straight forward in its delivery. Overall I would it was nice and I found myself on the edge of my seat when the storyline hit it's second chapter.. The complete soundtrack doesn't include every song in the game hmmm. The best soundtrack of all time.

Would whistle and play guitar to again 10V10 SWERY I love you.. Literally bought this for "Life is Beautiful" After listening to just a tiny clip of this song, I'll be whistling this all god damn day. I love it. Another favorite is "FBI special agent" But of course they're all great. Listening to it now.. and my day has just started.. Ever get the need to drink coffee, read a great story, shave, eat a strawberry & cereal turkey sandwich, get rained on by demon hounds, deliver a crazy kitchen pot lady to her house, win a dart tournament, fish up bullets and evidence in a waterfall, find a barbell named Arnold, steal a gun from a dog, pay 35 dollars for crackers, talk to a dead guy, and get told ghost stories by a rock star. Then you'll love this game's great story about the metaphoric symbolism of sadist and masochistic relationships within the Tom & Jerry cartoon and the game's great characters. Requires a mod to get past certain points in the game, it also helps a lot to run in compatibility mode for Windows 98 for less crashes. I want you to buy this game so Swery65 has more money to travel to foreign countries and post pictures on his instagram of him drinking their beers.. OK. Even the soundtrack is like Twin Peaks, - just like the show, they use about 4-5 of the same tracks over and over for nearly every scene, even though the soundtrack contains loads more.... I LOVE IT.. Why did I have to reinstall this buggy port to gain access to this amazing OST?

One of those soundtracks that might don't fit anywhere except in the game they came from, and in those very specific moments. Every song has its context and place. Listening to it without playing the game won't give you the same feeling, with the probable exception of Life is Beautiful (whistle theme) and The Woods and the Goddess, both fo which are downright amazing by themselves.

It's hard to recommend a soundtrack for this price, BUT if you liked the game you most likely know it's a good sountrack already.

Warning: Listening to this soundtrack while drinking coffee with milk may suddenly make the letters FK appear in the coffee. It never fails!
